Abbey National Bldg Soc. 13. 11. 82.

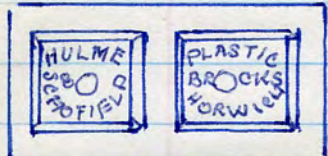

2000

This brick was taken from buildings forming part of the Abbey National Bldg Soc. Office which itself is partly constructed on land comprising 221B Baker Street, the legendary home of Sherlock Holmes.

The brick was removed in the early stages of rebuilding in 1980 when work began to renovate + assist in bringing the building up to modern standards whilst preserving the facades and individuality of a unique building.

Of all famous addresses, 221B Baker Street is perhaps one of the best known in London. Established by Sir Arthur Conan Doyle as the residence of that great fictional detective Sherlock Holmes + his companion Dr John H Watson, it is a location visited by people from all over the world.
